Education

Indian Institute of Information Technology, Bhopal

Graduated: 2027

Bachelor of Technology in Information Technology

CGPA: 8.02 / 10

Relevant Coursework: Data Structures and Algorithms, Object-Oriented Programming (OOP), Database Management Systems (DBMS), Computer Networks, Operating Systems

Experience

Full Stack Developer Intern

Dec 2025 – Jan 2026

Flikt Technology Web Solution (Remote)

Tools Used: Node.js, Express.js, Flask

- **Developed a responsive and user-friendly web interface using React.js**, focusing on clean UI design, smooth navigation, and consistent user experience across multiple devices and screen sizes.
- **Built and integrated RESTful APIs using Node.js and Express.js**, enabling efficient data processing, structured backend logic, and seamless communication between frontend and server-side components.

Backend Development Intern

Sept 2025 – Nov 2025

Roots technology (Remote)

- **Developed and maintained backend services using Node.js and Express.js**, implementing modular and scalable API structures to handle application logic and ensure smooth data flow across different components.
- **Worked with databases such as MongoDB/MySQL** to design efficient schemas, perform CRUD operations, and optimize queries for reliable data storage and retrieval in real-world use cases.

Projects

Travel AI | *Node.js, Express.js, MongoDB, React.js*

[GitHub](#) | [Link](#)

- **Built a full-stack TravelAI platform** using the MERN stack to generate **personalized travel recommendations** based on user preferences, enhancing user engagement and decision-making.
- **Designed and implemented RESTful APIs** and optimized **MongoDB database schemas** for efficient data storage, retrieval, and seamless frontend-backend communication.
- **Developed a responsive and dynamic user interface** using React.js, enabling **real-time data rendering** and improving overall user experience across devices.

SmartAttendAI | *OpenCV, Face Recognition, NumPy, Pandas, Streamlit, Flask*

[GitHub](#)

- **Developed a smart attendance system using facial recognition** to automatically detect and mark attendance in real-time, significantly reducing manual effort while improving accuracy and reliability of records.
- **Implemented face detection and recognition using OpenCV and Face Recognition library** to accurately identify registered users and store timestamped attendance data in a structured and organized format.
- **Built an interactive web interface using Streamlit with Flask integration** to enable user registration, manage facial datasets, and efficiently visualize and track attendance records.

HealthStack | *React.js, Django, PostgreSQL, REST APIs, WebRTC*

[GitHub](#)

- **Built a scalable full-stack healthcare platform using React.js and Django**, developing RESTful APIs for authentication, appointment scheduling, and real-time user interactions with reliable performance.
- **Designed and optimized PostgreSQL database schemas** to manage patient records, consultations, and reports, improving query efficiency, ensuring data consistency, and maintaining secure storage.
- **Implemented real-time chat and video consultations using WebRTC and APIs** to enable seamless doctor-patient communication, along with analytics features for tracking system usage and performance.

Achievements

- Solved **650+ DSA problems** across LeetCode, GeeksforGeeks, and Codeforces, demonstrating strong algorithmic and problem-solving skills.
- Achieved **3-Star rating on CodeChef** and **1750+ rating on LeetCode**, reflecting consistent performance in competitive programming.
- **Amazon ML Summer School 2025:** Selected participant, explored core ML concepts and real-world applications.
- **Participated 3 times in SIH**, Worked on innovative problem statements in a team-based environment

Skills

Frontend: HTML5, CSS3, JavaScript, c, c++, javascript(ES6+), Tailwind CSS, Material UI

Backend: Node.js, Express.js, Django, RESTful APIs, MVC Architecture

Database: MongoDB, MySQL, PostgreSQL, Redis

DevOps & Tools: Docker, Kubernetes, CI/CD, Git, GitHub, Postman

Core Skills: Data Structures & Algorithms, OOPs, Problem Solving, System Design (Basics) e
